

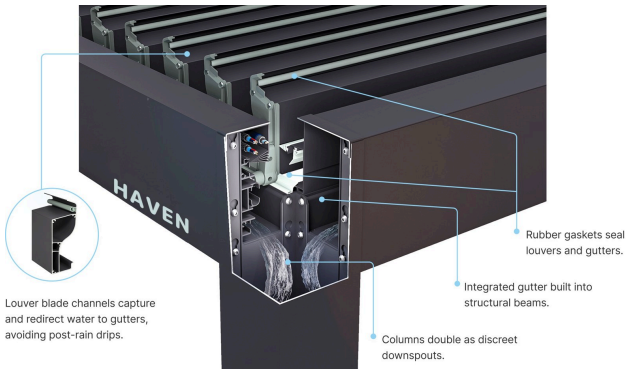
PERGOLAST · HAVEN COLLECTION · LOUVERED ROOF PERGOLA

Haven

Built to measure. Built to last.

Haven is Pergolast's louvered pergola, designed for your space rather than for a shipping box. Motorized aluminum louvers tilt from 0 to 110°, so you get sun, shade or shelter at the touch of a remote. Every Haven is sized to your terrace, finished in the color you choose, and engineered for the wind and snow where it will stand.

How it works



Cutaway: sealed louvers, the gutter inside the beam, water down through the posts

0° — **Closed**
Water-tight. Rain runs into the hidden gutter.

45° — **Filtered**
Soft light, less glare at lunch.

90° — **Open**
Full airflow on warm evenings.

110° — **Full sky**
Blades turn past upright for the widest view.

0–110°	125 mph	55 psf	10 yrs
Louver rotation, motorized	Wind rating	Snow load	Warranty on the frame

Made for

Homeowners
A permanent roof with light you can control.

Restaurants
Patio tables open in any forecast.

Rooftops and terraces
Wind and snow engineered, not guessed.

Dining under a Haven roof

What you get

Tilt. Shade. Close.

Set the louvers anywhere from 0 to 110°. Open them for a breeze, angle them for filtered light, or close them the moment rain starts.

Rain in. Drip free.

Water runs off the louvers into gutters hidden in the frame, then down through the posts and out at the footing. Nothing drips on your table.

Solid posts. Real engineering.

Aluminum posts 7⅛″ × 7⅛″ with a 3 mm wall. Wind and snow loads are designed to ASCE 7 for your address and reviewed by a licensed engineer.

No standard sizes. Your size.

We measure your space and build Haven to fit it. Single modules up to 14′ × 20′, and modules combine for bigger spaces.

Any color. Any evening.

Choose from 12 finishes, including three wood-grain looks, or any RAL color. Add dimmable LED so the space works after sunset.

Remote control. Manual backup.

The motor control unit sits inside the frame, out of sight. A manual option keeps the roof working without power.

One roof. A whole room.

Add Haven Shade screens, Haven Rise guillotine glass or Haven Glide sliding doors, and the pergola becomes a complete outdoor room.

Sensors that think ahead.

Optional wind, rain and sun sensors close the roof for you when the weather turns.
